

MICHIGAN WATER COLLABORATION NETWORK PARTICIPANT FEEDBACK

The following are key takeaways and feedback we received through our post-workshop survey. The survey had 29 respondents for a 67% response rate.

2017 Workshop: Key Takeaways

- Participants had many opportunities to make new connections through the workshop, with a majority of participants knowing 30% or fewer of the other participants.
- Participants found the presentations (~95%), large group discussions (~90%), lunch time networking (~80%), and breakout sessions (~75%) to be useful or very useful:

- Almost every respondent thought that the workshop achieved its goals of:
 - Highlighting successful partnerships (100%);
 - Providing networking opportunities (97%); and
 - Identifying opportunities for new state-university partnerships (83%).
- Nearly all respondents (27 of 29) indicated that they are, or may be, interested in continuing to work with their breakout group:

Breakout Group	Yes	Maybe	No
Nutrients	6	1	0
Environmental Contaminants	1	2	2
Fisheries	4	4	0
Source Tracking and Genetic Applications	5	3	0

- Breakout participants thought the following support would help them continue their interaction:

Breakout Group	Conference Call	Webinars	Workshop	No Assistance
Nutrients	3	2	2	3
Environmental Contaminants	1	3	3	1
Fisheries	4	2	3	2
Source Tracking & Genetics	4	5	3	0
